Lastly, I would like you to know how important it is for us to receive your thoughts and comments about your stay here at Kuredu. This helps to fine-tune all our services to consistently offer a holiday that you would want to repeat many times over and recommend to your family and friends.

With so much to do on Kuredu, it is understandable that not everyone wants to enrol in the full PADI Open Water Diver Course. For all those who want to experience the thrill of breathing underwater and catch a glimpse of what lies beneath the surface around the resort, the best option is the PADI Discover Scuba Diving program. During this program your instructor will explain to you the basics of scuba equipment, you will learn some key skills to make you feel comfortable, safe and most importantly help you to have loads of fun.

Please contact our dive centre to find out more about our diving packages.

**HEAVEN ON EARTH**

Many of you consider Kuredu a heaven on Earth, so what better way to increase your energy levels and find complete relaxation than at Duniye Spa. The 'Heaven on Earth' signature treatment is the ultimate body and face ritual: an Oriental massage, followed by a nourishing hand therapy and hydrating facials for a complete top to toe ritual. Our tip: Combine the signature treatment with the unwinding Milk bath at Duniye Over Water Spa, where the bath tubs are suspended over the azure lagoon.

Dear Guest,

It's our great pleasure to welcome you on our island. We hope you have a great stay and enjoy your time on Kuredu. We kindly want to remind you a few safety tips for an unforgettable Maldivian holiday retreat to enjoy the vibrant reefs and the beautiful island.

#### SWIMMING SAFETY

Please note that we do not have a lifeguard on duty and swimming is at your own risk.

**Never swim alone - use the buddy system.** Don't overestimate your swimming ability. A lot of people are used to swimming in the pool, in still water. Conditions are different in open water, and distance and direction are affected by currents. If you find yourself in a strong current, it is best not to tire yourself by trying to swim against it, rather swim diagonally across it, until you reach shore, further down the beach.

**Always wear full snorkeling equipment including fins.**

**Always evaluate the conditions and do not go out when there is strong wind, choppy seas or bad weather.**

**Please avoid swimming when it is dark.**

**Never swim while intoxicated.** Alcohol impairs judgement, unnecessary risks are taken and a swimmer will tire more easily, increasing the chance of an accident. Alcohol is a contributory factor in one third of all major incidents in the water.

Even the Maldives have warm waters; the water is still relatively cool compared to your body temperature. This can lead to hypothermia. Heat dissipates a lot quicker from muscles, arms and legs. Once arms and legs start to lose heat then you have no power in them. This leads to not having the power to swim the distance to get back. That is why people get into trouble in the water. So limit your swimming time.

**If you experience problems while swimming and snorkelling please follow these procedures:**

- 1) **Stay calm and don't panic**
- 2) **Take off your mask and snorkel**
- 3) **Turn on to your back and swim backwards**
- 4) **Wave your hands to signal that you need help**

#### STAYING SAFE UNDERWATER

**The key is simply don't touch.** Sea creatures tend to stay away from humans, the titan triggerfish is the only fish that will actually come for you if you get too close during its mating season. It will tilt sideways and fly at you fearlessly. Usually these are bluff charges and you should swim away promptly and horizontally. Please do not take anything from the sea or beach, bring back home only memories.

#### STAYING SAFE ON LAND

**Drink enough water...Minimum 2 litres a day, the more the better.**

Drinks, such as soft drinks, coffee, or alcohol-containing beverages, are no substitute for water. Although they contain water, they also contain ingredients which are dehydrating. **GO ONE FOR ONE. When you consume alcohol, drinking almost the same amount of water is recommended in between drinks.**

**FOR DETAILED INFORMATION PLEASE VISIT OUR PRODIVERS CENTRE.**

# Sea Turtle Code of Conduct

By following our simple code of conduct, you avoid disturbing these beautiful creatures. It will also give you the chance to experience a unique wildlife encounter.

## How to act around nesting turtles

- 1 Pay attention.** When you see a turtle coming up the beach, keep your distance, turn off any lights you are using and crouch down low. Do NOT walk closer!
- 2 Avoid loud noises.**
- 3 Do NOT take pictures of the turtle with flash.**
- 4 Do NOT walk or stand in front of the turtle.** Only approach the turtle carefully from behind after she has started laying eggs.
- 5 Do NOT shine a flashlight in a turtle's face.**
- 6 Do NOT touch the turtle.** If the turtle appears to be in distress or is stuck, help the turtle find its way back to the ocean or seek professional help.

## How to act around hatching turtles

- 1 Turn off bright lights.** Lights may distract the turtles from finding their way into the water.
- 2 No flash photography.**
- 3 Watch your step.** Be careful not to step on hatchlings on the beach.
- 4 Do NOT handle hatchlings** unless advised otherwise by a qualified person.
- 5 If you find hatchlings** that appear disoriented or have gone inland, gently rotate the hatchlings to face the ocean and seek professional help if necessary.

## How to swim with turtles

- 1 Be quiet.** When swimming up to a turtle, do so as quietly as possible because loud noises may scare them away. Snorkelers should minimize splashing and talking.
- 2 Do NOT disrupt the turtle's natural behaviour.** Watch and enjoy!
- 3 Always approach turtles from the side.** This gives them a clear view of you and a clear path ahead of them if they want to swim away.
- 4 Do NOT chase after the turtle!** This can cause severe stress to the turtle.
- 5 Do NOT touch the turtle!** They can feel your touch and do not enjoy being petted.
- 6 Do NOT swim directly above the turtle.** They are reptiles and need to come to the surface to breathe.
- 7 Do not get too close!** Turtles can deliver a very strong bite.
- 8 Do NOT try to feed turtles!** They do not need your help to find food and could accidentally bite you.

## For Divers only

- 1 Pay attention.** When encountering a turtle while diving, observe them closely to see what they are doing. **Do NOT disturb resting turtles.** Always keep a distance of 1.5 meters (do not approach closer).
- 2 Be still.** If a turtle is swimming towards you, keep still and avoid sudden movements.
- 3 Give them space.** When encountering turtles resting in caves or under overhangs, be careful to give them enough room so they can surface to breathe.

Dear Guests,

For your convenience and understanding of the seaplane transfer operation, please find below an outline of how **Trans Maldivian Airways** works to the best of its abilities to ensure your journey to and from the resort is memorable, timely and safe.

The company operates a fleet of 55 seaplanes, flying to 65 resorts throughout the Maldives. On usual days two of these seaplanes are allocated to Kuredu Island Resort & Spa. Seaplane schedules are prepared by Trans Maldivian Airways in the best possible way to get passengers to and from their resorts in a timely manner. Due to the limited number of aircrafts and the large number of resorts they service, it might unfortunately come to longer waiting times at the airport in Male on your arrival and on your departure day. Especially guests who have a late international flight from Male might experience inconvenience resulting from the fact that seaplanes operate by visual flight rules and therefore only fly during daylight hours. Once Trans Maldivian Airways has released the flight schedule for the next day, you will receive information to your room; this is done the evening before your departure day. For your convenience, our team will include recommendations on things to do in Male should you wish to make the most of any waiting time before your international flight.

Please note that unsettled weather conditions in Male, nearby Kuredu, or anywhere on the route will affect seaplane operations and could lead to delays or even flight cancellations. Departure seaplanes from Kuredu to Male might leave earlier than scheduled if bad weather is predicted. Trans Maldivian Airways always strives to bring its customers to their destinations as fast as possible, however safety is always the highest priority.

Each aircraft has weight restrictions. As the transport of passengers takes priority, under certain circumstances your luggage may not be loaded on your seaplane but may arrive on a subsequent flight. Please rest ensured that Trans Maldivian Airways tries to bring all luggage to its destination as soon as possible.

Thank you very much for your understanding. We wish you a scenic and pleasant seaplane journey to and from Kuredu!

If you love the ocean, swimming alongside sea turtles is surely on your bucket list. Thanks to Lhaviyani Atoll's large sea turtle population, Kuredu is one of the Maldives' most well-known jumping-off resorts to make it happen; here you can snorkel or dive with these ancient, graceful creatures and learn more about the importance of their conservation.

According to Kuredu's resident Sea Turtle Biologist and Educator and Olive Ridley Project team member who's at the wheel of the resort's Marine Center, a total of 287 sea turtles have been identified in the atoll. Of these, 170 turtles are green sea turtles, meaning that nearly half of all the green sea turtles in the Maldives live in this area. In addition to the atoll's green sea turtles, 103 hawksbill turtles have been identified.

Almost half of all the identified green sea turtles in the Maldives live in Lhaviyani Atoll, and nearly all of them can be found around Kuredu.
